

NIKHIL THAKUR

Kangra, Himachal Pradesh | +91 7876405057 | nikhilthakurrehlu@gmail.com | linkedin.com/in/nikhilthakur

CAREER OBJECTIVE

Motivated Computer Science Engineering student with working knowledge of AI, Python programming, and Full-Stack Web Development. Adept at applying Data Structures & Algorithms to build efficient, real-world software solutions, with practical exposure gained through multiple internships and self-driven projects. Seeking to contribute technical skills and a strong learning mindset to a challenging Software Development role.

EDUCATION

- B.Tech, Computer Science & Engineering — University Institute of Technology, Shimla**2024 – 2027
- Diploma, Computer Science & Engineering — Himachal Institute of Engineering & Technology**2022 – 2024

TECHNICAL SKILLS

- Programming & Core CS:** Python, Data Structures & Algorithms, Database Fundamentals
- Web Development & AI/ML:** Full-Stack Web Development, Artificial Intelligence, Machine Learning Fundamentals, Data Analytics, Data Visualization
- Tools & Soft Skills:** Git & GitHub, MS Excel, Communication & Teamwork, Problem Solving

WORK EXPERIENCE

- AI Intern — InternzValley (Remote)**Sep 2026 – Present
 - Gaining practical experience in Artificial Intelligence through real-world tasks, structured training, and applied projects
 - Strengthening Python-based problem-solving and technical development skills through practical, real-world activities
- Data Science with Python (Training) — Solitaire Infosystem Pvt. Ltd., Mohali**Aug 2026 – Sep 2026
 - Completing practical training in Data Science with Python, covering core concepts and industry-relevant libraries
 - Gaining practical exposure to data loading, preprocessing, analysis, visualization, and machine learning fundamentals
- Data Analytics Intern — InAmigos Foundation (Virtual)**Jun 2026 – Jul 2026
 - Assisted with data collection, cleaning, and organization using Microsoft Excel
 - Prepared clear reports, charts, and dashboards to present analytical findings
 - Strengthened teamwork, communication, and time-management skills by consistently meeting deadlines

PROJECTS

- AI Resume Builder**2026
 - Built a Flask-based web app that generates structured, job-ready resumes from user input, with a split-panel form-and-live-preview interface
 - Designed a rule-based content engine for polished resume bullet points, with optional integration of the Google Gemini API for enhanced suggestions
- Chess Game (Python)**Mar 2025 – Aug 2025
 - Built a fully functional chess game using Python, Tkinter, and the python-chess library, with complete move validation and checkmate detection
 - Implemented an interactive GUI, undo functionality, and a basic AI opponent using algorithmic decision-making
- AttendFace – Face Recognition Smart Attendance System**Ongoing
 - Developing a real-time face detection and recognition system using Python and OpenCV
 - Automating attendance marking with timestamped record storage in Excel to reduce manual effort

CERTIFICATIONS & TRAININGS

- Professional Edge Career Essentials — NIIT Foundation (Supported by Infosys Foundation), Virtual**| Oct 2025 – Nov 2025 (Awarded Good Grade)
- Full Stack Web Development (In Progress) — Internshala Trainings**| 2026

EXTRA-CURRICULAR ACTIVITIES

Actively engaged in internships and training programs across Data Analytics, AI/ML, and Data Science, alongside the Professional Edge Career Essentials program by NIIT Foundation. Continuously exploring AI, Machine Learning, Cloud Computing, and DSA through technical workshops and self-driven learning.
